USER GUIDE TO WASTE RECEPTION FROM VESSELS AT MARINA BADALONA

Guide to the delivery of waste from vessels based at the Port or calling temporarily, including fishing vessels, in accordance with the Ship Waste Reception and Handling Plan(PRMD).

1. Contact and assistance

- Harbour Master's Office · Marina and Fishing Port, 08912 Badalona.
- Telephone: 93 320 75 00 · Email: port@marinabadalona.cat
- In-person service: Monday to Friday, 08.00 - 18.00; Saturdays, Sundays and public holidays, 10.00 - 14.00.
- 24-hour Port emergency number: 93 320 75 72.

2. Waste reception points

WASTE	FACILITY	LOCATION AND AVAILABILITY
Bilge water, greywater and blackwater	Bilge water and wastewater suction facility	At the boat fuel station. Service by prior arrangement with the Harbour Master's Office and under port staff supervision.
Organic waste, packaging, paper and cardboard, glass and residual waste	Separate waste collection containers	At various points around the port. Available 24 hours a day, 365 days a year
Special (hazardous) waste	North Green Point	Northern area of the port. Ask the Harbour Master's Office about access and delivery conditions
	Boatyard Green Point	Inside the boatyard, from 08:00 to 18:15, while the premises are open.

3. Waste types and delivery conditions

Bilge water and hydrocarbons (MARPOL Annex I). Contact the Harbour Master's Office to arrange assistance from the port operations team. Bilge water is removed by suction at the facility located at the boat fuel station. For used oils and other hydrocarbon waste, contact the Harbour Master's Office. These must be delivered to the Green Point in a sealed container.

Sanitary wastewater (MARPOL Annex IV). Contact the Harbour Master's Office to arrange assistance from the port operations team. Wastewater is collected by suction at the facility located at the boat fuel station. Separate discharge points are available for greywater and blackwater.

Solid waste (MARPOL Annex V). Sort each waste fraction into the appropriate container. For contaminated packaging and bulky items, contact the Harbour Master's Office to arrange assistance from the port operations team. Check in advance how to deliver bulky waste, wood, metals and plastics that are not packaging.

Special waste. To dispose of contaminated absorbents and filters, batteries, cells, solvents, paints, aerosols, fluorescent tubes and electrical equipment, contact the Harbour Master's Office. These items must be delivered separately to the Green Point with assistance from the port operations team.

Fishing waste. Separate nets, disused fishing gear and waste caught accidentally. Nets must be placed in the dedicated container next to the fish auction hall. For other special waste, consult the Harbour Master's Office.

Special deliveries. Cooking oil must be delivered in sealed, labelled containers after prior notification. Do not place expired flares in containers, at the Green Point or in any other collection point on the premises. They must be returned to the producer. Cargo residues, which are accepted only in exceptional cases, must be collected directly by an authorised waste manager; they are not accepted in containers or at Green Points.

4. Requesting services

1. Contact the Harbour Master's Office. Provide the vessel name, berth, type of waste and approximate quantity.

2. Arrange the delivery. Staff will confirm the collection point, time and equipament required to collect the specific waste.

3. Follow staff instructions. Suction operations of MARPOL Annex I and IV discharges are supervised by the port operations team.

4. Confirm the delivery. Port staff will check the recorded details and provide a receipt or proof of delivery where applicable.

5. Rates

Current fees for waste reception and management services are published and updated annually on the Marina de Badalona website: www.marinabadalona.cat > EL PORT > RATES.

The cost of ordinary waste is included in the berth maintenance fee. Bilge water and sanitary wastewater suction services are included for vessels based at the port. Vessels from other ports are charged the applicable fee. Check the conditions for special services before requesting them.

6. Essentials rules

Separate waste, avoid mixing incompatible substances, and use suitable, intact and sealed containers where required. Do not leave bags or materials outside the containers. Do not discharge waste into the sea, onto the ground or into the sewer system except through the designated channels. Keep electrical equipment intact and do not dismantle it.

Waste generated by industrial activities in the boatyard and by commercial premises is managed through separate arrangements and at the expense of the waste producers.

7. Incidents and complaints

Report full containers, breakdowns, delays, improper collection or spills to the Harbour Master's Office or port staff, in person, by telephone, by email or using the complaints form.

Provide the date, vessel and berth, type of waste, affected facility and a description of what happened. Marina de Badalona will record the incident, take corrective action and communicate the outcome. The right to submit a formal complaint remains unaffected.

In the event of a spill or environmental risk, immediately call (+34) 93 320 75 72 and follow staff instructions.

8. Management and information

Marina de Badalona, SA manages the facilities and coordinates the selective collection and services provided by authorised waste managers. The Harbour Master's Office and port operations team can advise on the applicable procedures and the waste manager assigned to each service.

Updated information is available from the Harbour Master's Office, at www.marinabadalona.cat and in the Customer Area.
